

Research a European country of your choice.

You may want to find out about their main language, population, flag, capital city, festivals they celebrate. Think carefully about how you can present your research

Create a map of where you live.

It could be your street or even your village.

Create a key to show any places of interest.

**Exploring Europe (Geog)**

**Light and Electricity  
(Science topic)**

**Topic Homework**

**Summer 2 Year 3-4**

Share some of the Spanish you have learnt with someone at home. You could create a glossary of terms or record yourself speaking.

Create a song/chant to help you remember a times table of your choice. You could add music instruments to it.

Try recording it and uploading it on to Google classroom.

Make a shadow puppet show.

You will want to think about your puppets, how you will create the shadow/light and what the show will be about.

Will you need a script?

Does someone else in your family need to be involved too!?

Bring in your puppet/stage or record yourself to email or upload on to Google classroom.
